

BARBIE MAHAJAN

Seeking 2026 / 2027 Cybersecurity • SOC Analyst • GRC Internship

0451 378 614 | barbiemahajan721@gmail.com | github.com/Gopher-Industries/Food-Remedy_API

PROFILE

Bachelor of Cyber Security student (Deakin University) with 18 completed units spanning digital forensics, malware analysis, network security, network forensics, and ethical hacking, plus hands-on experience in a real multi-team capstone software project. Proven ability to investigate technical issues methodically, back every finding with evidence, and communicate results clearly to a team. Combines this technical coursework with 1.5+ years of professional experience handling confidential records, triaging time-sensitive issues, and maintaining audit-ready documentation — seeking a placement where these strengths support a SOC, GRC, or broader cyber security team.

EDUCATION

Bachelor of Cyber Security

2023 – Present

Deakin University — 18 units completed across 7 trimesters

Specialised units: SIT282 Computer Forensics & Investigations • SIT324 Malware Analysis • SIT325 Advanced Network Security • SIT326 Advanced Network Analytics & Forensics • SIT327 Network Forensics • SIT379 Ethical Hacking • SIT384 Cyber Security Analytics • SIT281 Cryptography • SIT218 Secure Coding

Capstone: SIT378 Team Project (B): Execution & Delivery • SIT374 Team Project (A): Project Management & Practices

Foundational: SIT111 Computer Systems • SIT182 Real World Practices for Cyber Security • SIT191 Statistics & Data Analysis • SIT202 Computer Networks & Communication • SIT221 Data Structures & Algorithms • SIT223 Professional Practice in IT • SIT232 Object-Oriented Development

CAPSTONE PROJECT — FOOD REMEDY API

Database Team Contributor — Gopher Industries (SIT378 Team Project (B))

Trimester 2, 2026

Real, multi-team production software project — a mobile app helping consumers assess dietary compatibility of supermarket products

- Delivered 7 tickets end-to-end (DB011, DB013, DB021, DB025, DB038-2, DB030, DB056), each backed by a structured pull request and, for investigation-heavy tickets, a full written report with evidence and prioritised recommendations
- Found and fixed a **release-critical bug** in the product-data cleaning pipeline that the team's own automated tests had missed — verified directly against real committed data and confirmed by an executed regression test suite
- Independently identified and flagged an **unrestricted Firestore security rule** outside my own ticket scope, and resolved two separate ticket-ID collisions on the team's planning board before they caused conflicts
- Adapted professionally to a mid-trimester role change from the Backend Team to the Database Team, communicating the change proactively without disrupting delivery

Tools: React Native (Expo) • Firebase (Firestore & Auth) • JavaScript • Python • Docker • Git / PR Workflow | Self-assessed: Distinction

PROFESSIONAL EXPERIENCE

Schedule Coordinator

Jan 2026 – Present

Nurse 4 U

- Triage competing, time-sensitive coverage requests under pressure — the same rapid prioritisation SOC alert queues demand
- Maintain accurate, auditable scheduling records and confidential personal information in line with privacy and data-handling standards
- Identify anomalies and coverage gaps against expected patterns, then document and resolve them before they become incidents

Rostering Coordinator

Jun 2024 – Jan 2026

Royal Freemasons Coppin Centre

- Handled shift changes and short-notice absences calmly under time pressure, keeping a clear, documented record of every change
- Maintained confidential employee and scheduling data with the accuracy and discretion sensitive personal records require
- Audited roster accuracy against policy and flagged discrepancies before they escalated into compliance issues

SKILLS

Security & Compliance: Digital Forensics & Investigation • Malware Analysis (Ghidra) • MITRE ATT&CK Framework • Security Misconfiguration Review • Privacy & Confidentiality • Compliance & Audit-Trail Documentation

Technical: Network Security Automation (Python) • Network Forensics • Ethical Hacking / Penetration Testing • Git / PR Workflow & Code Review • Evidence-Based Investigation & Reporting

Coordination: Incident Triage Under Pressure • Staff Rostering & Scheduling • Shift Allocation & Coverage • Leave & Availability Management

Communication: Stakeholder Communication • Conflict Resolution • Clear Reporting & Escalation
